[About Operational Testing Products]

"Operational Testing Products" means electrical equipment in the market which EPSON evaluated and confirmed those work when they were connected/built in/incorporated with EPSON POS products. But their operation were confirmed only under the environment and condition as of the time they were evaluated. So EPSON does not guarantee or insure anything about the equipment other than those work with EPSON POS products under those environment and condition.

The purpose of release of this List is to supply the information for selection of peripheral equipment to our customer who integrates system with EPSON POS products.

So please evaluate the equipment with your system by yourself if you want to use them.
