About This Manual

Note for North American and Latin American Users

Before using this product, make sure you read the safety instructions in the online Notices.

Introduction to the Manuals

The following manuals are supplied with your Epson printer. As well as the manuals, check the various types of help information available from the printer itself or from the Epson software applications.

- **Important Safety Instructions (paper manual)**
  Provides you with instructions to ensure the safe use of this printer.

- **Start Here (paper manual)**
  Provides you with information on setting up the printer and installing the software.

  This manual. This manual is available in PDF and web formats. It provides overall information and instructions on using the printer, on network settings when using the printer on a network, and on solving problems.

You can obtain the latest versions of the above manuals with the following methods.

- **Paper manual**
  Visit the Epson Europe support website at [http://www.epson.eu/support](http://www.epson.eu/support), or the Epson worldwide support website at [http://support.epson.net/](http://support.epson.net/).

- **Digital manual**
  To view the Web manual, visit the following website, enter the product name, and then go to Support.
  [http://epson.sn](http://epson.sn)

For Users in North America and Latin America

Visit the following website for the latest versions of the manuals:

- [www.epson.com/support/scf170](http://www.epson.com/support/scf170) (U.S.)
- [www.epson.ca/support/scf170](http://www.epson.ca/support/scf170) (Canada)

Using the Manual to Search for Information

The PDF manual allows you to search for information you are looking for by keyword, or jump directly to specific sections using the bookmarks. You can also print only the pages you need. This section explains how to use a PDF manual that has been opened in Adobe Reader X on your computer.
Searching by keyword
Click Edit > Advanced Search. Enter the keyword (text) for information you want to find in the search window, and then click Search. Hits are displayed as a list. Click one of the displayed hits to jump to that page.

Jumping directly from bookmarks
Click a title to jump to that page. Click + or > to view the lower level titles in that section. To return to the previous page, perform the following operation on your keyboard.

- Windows: Hold down Alt, and then press ←.
- Mac OS: Hold down the command key, and then press ←.

Printing only the pages you need
You can extract and print only the pages you need. Click Print in the File menu, and then specify the pages you want to print in Pages in Pages to Print.

- To specify a series of pages, enter a hyphen between the start page and the end page.
  Example: 20-25
- To specify pages that are not in series, divide the pages with commas.
  Example: 5, 10, 15

Important Instructions

Safety Instructions

Read and follow these instructions to ensure safe use of this printer. Make sure you keep this manual for future reference. Also, be sure to follow all warnings and instructions marked on the printer.

- Some of the symbols used on your printer are to ensure safety and proper use of the printer. Visit the following Web site to learn the meaning of the symbols.
  http://support.epson.net/symbols

- Use only the power cord supplied with the printer and do not use the cord with any other equipment. Use of other cords with this printer or the use of the supplied power cord with other equipment may result in fire or electric shock.

- Be sure your AC power cord meets the relevant local safety standard.

- Never disassemble, modify, or attempt to repair the power cord, plug, printer unit, or options by yourself, except as specifically explained in the printer’s manuals.

- Unplug the printer and refer servicing to qualified service personnel under the following conditions:
  - The power cord or plug is damaged; liquid has entered the printer; the printer has been dropped or the casing is damaged; the printer does not operate normally or exhibits a distinct change in performance. Do not adjust controls that are not covered by the operating instructions.

- Place the printer near a wall outlet where the plug can be easily unplugged.

- Do not place or store the printer outdoors, near excessive dirt or dust, water, heat sources, or in locations subject to shocks, vibrations, high temperature or humidity.

- Take care not to spill liquid on the printer and not to handle the printer with wet hands.

- Keep the printer at least 22 cm (8.6 inches) away from cardiac pacemakers. Radio waves from this printer may adversely affect the operation of cardiac pacemakers.

- If the LCD screen is damaged, contact your dealer or Epson support. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.

Safety Instructions for Ink

- Be careful not to touch any ink when you handle the ink tanks, ink tank caps, and opened ink bottles or ink bottle caps.

- If ink gets on your skin, wash the area thoroughly with soap and water.

- If ink gets into your eyes, flush them immediately with water. If discomfort or vision problems continue after a thorough flushing, see a doctor immediately.

- If ink gets into your mouth, see a doctor right away.

- Do not disassemble the maintenance box; otherwise ink may get into your eyes or on your skin.

- Do not shake an ink bottle too vigorously or subject it to strong impacts as this can cause ink to leak.

- Keep ink bottles and maintenance box out of the reach of children. Do not allow children to drink from the ink bottles.
Printer Advisories and Warnings

Read and follow these instructions to avoid damaging the printer or your property. Make sure you keep this manual for future reference.

Advisories and Warnings for Setting Up the Printer

- Do not block or cover the vents and openings in the printer.
- Use only the type of power source indicated on the printer's label.
- Avoid using outlets on the same circuit as photocopiers or air control systems that regularly switch on and off.
- Avoid electrical outlets controlled by wall switches or automatic timers.
- Keep the entire computer system away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.
- The power-supply cords should be placed to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of the power-supply cords and do not allow the power-supply cords to be stepped on or run over. Be particularly careful to keep all the power-supply cords straight at the ends and the points where they enter and leave the transformer.
- If you use an extension cord with the printer, make sure that the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure that the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- If you plan to use the printer in Germany, the building installation must be protected by a 10 or 16 amp circuit breaker to provide adequate short-circuit protection and over-current protection for the printer.
- When connecting the printer to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
- Place the printer on a flat, stable surface that extends beyond the base of the printer in all directions. The printer will not operate properly if it is tilted at an angle.
- Allow space above the printer so that you can fully raise the printer cover.
- Leave enough space in front of the printer for the paper to be fully ejected.
- Avoid places subject to rapid changes in temperature and humidity. Also, keep the printer away from direct sunlight, strong light, or heat sources.

Advisories and Warnings for Using the Printer

- Do not insert objects through the slots in the printer.
- Do not put your hand inside the printer during printing.
- Do not touch the white flat cable and ink tubes inside the printer.
- Do not use aerosol products that contain flammable gases inside or around the printer. Doing so may cause fire.
- Do not move the print head by hand; otherwise, you may damage the printer.
- Prolonged use of the printer when the ink level is below the lower line could damage the printer. Fill the ink tank to the upper line while the printer is not operating. To display the correct ink level estimates, reset the ink level after filling the tank.
Always turn the printer off using the button. Do not unplug the printer or turn off the power at the outlet until the light stops flashing.

If you are not going to use the printer for a long period, be sure to unplug the power cord from the electrical outlet.

Advisories and Warnings for Transporting or Storing the Printer

- When storing or transporting the printer, avoid tilting it, placing it vertically, or turning it upside down; otherwise ink may leak.
- Before transporting the printer, make sure that the print head is in the home (far right) position.

Advisories and Warnings for Using the Printer with a Wireless Connection

- Radio waves from this printer may negatively affect the operation of medical electronic equipment, causing them to malfunction. When using this printer inside medical facilities or near medical equipment, follow directions from the authorized personnel representing the medical facilities, and follow all posted warnings and directions on the medical equipment.
- Radio waves from this printer may negatively affect the operation of automatically controlled devices such as automatic doors or fire alarms, and could lead to accidents due to malfunction. When using this printer near automatically controlled devices, follow all posted warnings and directions on these devices.

Advisories and Warnings for Using the LCD Screen

- The LCD screen may contain a few small bright or dark spots, and because of its features it may have an uneven brightness. These are normal and do not indicate that it is damaged in any way.
- Only use a dry, soft cloth for cleaning. Do not use liquid or chemical cleaners.
- The exterior cover of the LCD screen could break if it receives a heavy impact. Contact your dealer or Epson support if the screen's surface chips or cracks, and do not touch or attempt to remove the broken pieces.

Protecting Your Personal Information

When you give the printer to someone else or dispose of it, erase all the personal information stored in the printer’s memory by selecting **Settings > Restore Default Settings > Clear All Data and Settings** on the control panel.

Network Settings

Network Connection Types

You can use the following connection methods.

**Ethernet Connection**

Connect the printer to a hub with an Ethernet cable.

**Wi-Fi Connection**

Connect the printer and the computer or smart device to the access point. This is the typical connection method for home or office networks where computers are connected by Wi-Fi through the access point.

**Related Information**

► “Making Advanced Network Settings” on page 26
Wi-Fi Direct (Simple AP) Connection

Use this connection method when you are not using Wi-Fi at home or at the office, or when you want to connect the printer and the computer or smart device directly. In this mode, the printer acts as an wireless router and you can connect the devices to the printer without having to use a standard wireless router. However, devices directly connected to the printer cannot communicate with each other through the printer.

The printer can be connected by Wi-Fi or Ethernet, and Wi-Fi Direct (Simple AP) connection simultaneously. However, if you start a network connection in Wi-Fi Direct (Simple AP) connection when the printer is connected by Wi-Fi, the Wi-Fi is temporarily disconnected.

Connecting to a Computer

We recommend using the installer to connect the printer to a computer. You can run the installer using one of the following methods.

- Setting up from the website
  Access the following website, and then enter the product name. Go to Setup, and then start setting up.
  http://epson.sn

  North America and Latin America
  Access the following website, select your country, then search for your product to download the latest version of your product’s software installer:
  http://support.epson.net/
  To view and download software options, visit:
  www.epson.com/support/scf170 (U.S.)
  www.epson.ca/support/scf170 (Canada)
  www.latin.epson.com/support/scf170 (Latin America)
Setting up using the software disc (only for the models that come with a software disc and users with Windows computers with disc drives.)

Insert the software disc into the computer, and then follow the on-screen instructions.

Selecting the Connection Methods

Follow the on-screen instructions until the following screen is displayed, and then select the connection method of the printer to the computer.

Note:
The installer screens may look different depending on the region.

Select the connection type and then click Next.

Follow the on-screen instructions.

Making Wi-Fi Settings from the Printer

You can make network settings from the printer’s control panel in several ways. Choose the connection method that matches the environment and conditions that you are using.

If you know the information for the wireless router such as SSID and password, you can make settings manually.

If the wireless router supports WPS, you can make settings by using push button setup.

After connecting the printer to the network, connect to the printer from the device that you want to use (computer, smart device, tablet, and so on.)

Make advanced network settings to use a static IP address.
Making Wi-Fi Settings by Entering the SSID and Password

You can set up a Wi-Fi network by entering the information necessary to connect to a wireless router from the printer’s control panel. To set up using this method, you need the SSID and password for a wireless router.

Note:
If you are using a wireless router with its default settings, the SSID and password are on the label. If you do not know the SSID and password, contact the person who set up the wireless router, or see the documentation provided with the wireless router.

1. Select Wi-Fi on the home screen.

   To select an item, use the ▲▼➡️ buttons, and then press the OK button.

2. Select Wi-Fi (Recommended).

3. Press the OK button.

   If the network connection is already set up, the connection details are displayed. Select Change to Wi-Fi connection or Change Settings to change the settings.

4. Select Wi-Fi Setup Wizard.
5. Select the SSID for the wireless router.

   **Note:**
   - If the SSID you want to connect to is not displayed on the printer’s control panel, press the button to update the list. If it is still not displayed, press the button, and then enter the SSID directly.
   - If you do not know the network name (SSID) check if the information is written on the label of the wireless router. If you are using the wireless router with its default settings, use the SSID on the label. If you cannot find any information, see the documentation provided with the wireless router.

6. Enter the password.

   **Note:**
   - The password is case-sensitive.
   - If you do not know the password, check if the information is written on the label of the wireless router. On the label, the password may be written “Network Key”, “Wireless Password”, and so on. If you are using the wireless router with its default settings, use the password written on the label.

7. When you have setup finished, select **Start Setup**.

8. Select **Dismiss** to finish.

   **Note:**
   - If you fail to connect, load A4- or Letter-size plain paper, and then select **Print Check Report** to print a connection report.

**Making Wi-Fi Settings by Push Button Setup (WPS)**

You can automatically set up a Wi-Fi network by pressing a button on the access point. If the following conditions are met, you can set up by using this method.

- The access point is compatible with WPS (Wi-Fi Protected Setup).
- The current Wi-Fi connection was established by pressing a button on the access point.

   **Note:**
   - If you cannot find the button or you are setting up using the software, see the documentation provided with the access point.

1. Select **Wi-Fi** on the home screen.

   To select an item, use the buttons, and then press the OK button.

2. Select **Wi-Fi (Recommended)**.

   If the printer has already been connected by Ethernet, select **Router**.
3. Press the OK button.
   If the network connection is already set up, the connection details are displayed. Select Change Settings to change the settings.
   If the printer has already been connected by Ethernet, select Change to Wi-Fi connection, and then select Yes after checking the message.

5. Hold down the [WPS] button on the access point until the security light flashes.

6. Press the OK button on the printer.

7. Press the OK button.
   The screen automatically closes after a specific length of time.
   Note:
   If connection fails, restart the access point, move it closer to the printer, and try again. If it still does not work, print a network connection report and check the solution.

8. Press the button.

Making Wi-Fi Settings by PIN Code Setup (WPS)
You can automatically connect to an access point by using a PIN code. You can use this method to set up if an access point is capable of WPS (Wi-Fi Protected Setup). Use a computer to enter a PIN code into the access point.
Network Settings

1. Select Wi-Fi on the home screen.
   To select an item, use the ▲▼◄► buttons, and then press the OK button.

2. Select Wi-Fi (Recommended).
   If the printer has already been connected by Ethernet, select Router.

3. Press the OK button.
   If the network connection is already set up, the connection details are displayed. Select Change Settings to change the settings.
   If the printer has already been connected by Ethernet, select Change to Wi-Fi connection, and then select Yes after checking the message.

5. Use your computer to enter the PIN code (an eight digit number) displayed on the printer's control panel into the access point within two minutes.
   Note: See the documentation provided with your access point for details on entering a PIN code.

6. Press the OK button on the printer.

7. Press the OK button.
   The screen automatically closes after a specific length of time.
   Note: If connection fails, restart the access point, move it closer to the printer, and try again. If it still does not work, print a connection report and check the solution.

Making Wi-Fi Direct (Simple AP) Connection Settings

This method allows you to connect the printer directly to devices without an access point. The printer acts as an access point.

Important:
When you connect from a computer or smart device to the printer using the Wi-Fi Direct (Simple AP) connection, the printer is connected to the same Wi-Fi network (SSID) as the computer or smart device and the communication is established between them. Since the computer or smart device is automatically connected to the other connectable Wi-Fi network if the printer is turned off, it is not connected to the previous Wi-Fi network again if the printer is turned on. Connect to the printer’s SSID for Wi-Fi Direct (Simple AP) connection from the computer or smart device again. If you do not want to connect every time you turn the printer on or off, we recommend using Wi-Fi network by connecting the printer to an access point.
1. Select Wi-Fi on the home screen.
   To select an item, use the ▲▼◄► buttons, and then press the OK button.

2. Select Wi-Fi Direct.

3. Press the OK button.
   If you have made Wi-Fi Direct (Simple AP) settings, the detailed connection information is displayed. Go to step 5.

4. Press the OK button to start making settings.

5. Check the SSID and password displayed on the printer’s control panel.
   On the computer’s network connection screen or the smart device’s Wi-Fi screen, select the SSID shown on the
   printer’s control panel to connect.

   Note:
   For other regions than North America and Latin America
   You can check the connection method on the Web site. To access the Web site, scan the QR code displayed on the
   printer’s control panel using the smart device or enter the URL (http://epson.sn) on the computer, and then go to Setup.

6. Enter the password displayed on the printer’s control panel on the computer or smart device.

7. After the connection is established, select Dismiss on the printer’s control panel.

8. Press the button.
   To connect the computer to the printer using Wi-Fi Direct, you need to install the printer driver on the computer.

   To select an item, use the ▲▼◄► buttons, and then press the OK button.

2. Select **General Settings > Network Settings > Network Status**.

3. To check the information, select the menus that you want to check.
   
   - **Wired LAN/Wi-Fi Status**
     
     Displays the network information (device name, connection, signal strength, obtain IP address, and so on) for Ethernet or Wi-Fi connections.
   
   - **Wi-Fi Direct Status**
     
     Displays whether Wi-Fi Direct is enabled or disabled for Wi-Fi Direct connections.
   
   - **Print Status Sheet**
     
     Prints a network status sheet. The information for Ethernet, Wi-Fi, Wi-Fi Direct, and so on is printed on two or more pages.

Printing a Network Connection Report

You can print a network connection report to check the status between the printer and the wireless router.
1. Load papers.

2. Select **Settings** on the home screen.

   To select an item, use the ▲ ▼ ◀▶ buttons, and then press the OK button.

3. Select **General Settings > Network Settings > Connection Check**.

   The connection check starts.

4. Select **Print Check Report**.

5. Print the network connection report.

   If an error has occurred, check the network connection report, and then follow the printed solutions.

6. Close the screen.

Entered security key/password does not match the one set for your router/access point. Confirm security key/password. Contact your network administrator for assistance.

Solutions:
- Make sure your access point is turned on.
- Confirm that your computer or device is connected correctly to the access point.
- Turn off the access point. Wait for about 10 seconds, and then turn it on.
- Place the printer closer to your access point and remove any obstacles between them.
Network Settings

- If you have entered the SSID manually, check if it is correct. Check the SSID from the Network Status part on the network connection report.
- If you are using push button setup to establish a network connection, make sure your access point supports WPS. You cannot use push button setup if your access point does not support WPS.
- Make sure your SSID uses only ASCII characters (alphanumeric characters and symbols). The printer cannot display an SSID that contains non-ASCII characters.
- Make sure you know your SSID and password before connecting to the access point. If you are using an access point with its default settings, the SSID and password are located on a label on the access point. If you do not know your SSID and password, contact the person who set up the access point, or see the documentation provided with the access point.
- If you are connecting to an SSID generated from a tethering smart device, check for the SSID and password in the documentation provided with the smart device.
- If your Wi-Fi connection suddenly disconnects, check for the conditions below. If any of these conditions are applicable, reset your network settings by downloading and running the software from the following website.

**Paper Handling Precautions**

Note the following points when handling and storing the paper. If the paper is not in good condition, print quality may decline. Check the manuals supplied with each paper.

**Handling Precautions**

- Make sure you use genuine Epson transfer paper. If you use a paper other than genuine Epson paper, the color may not develop as expected, roller traces may be noticeable, or the ink may rub off.
- Use Epson special media under normal room conditions (temperature: 15 to 25°C (59 to 77°F); humidity: 40 to 60%).
- Do not fold the paper or scratch the surface of the paper.
- Avoid touching the printable surface of the paper with your bare hands. Moisture and oils from your hands can affect print quality.
- Handle paper by the edges. We also recommend that you wear cotton gloves.
- Paper may be wavy or slack if the temperature and humidity change. Load paper just before printing. Also, do not use paper that is wavy or slack.
- Do not wet the paper.
- Do not throw away the paper packaging as you can use it for storing the paper.
- Avoid locations that are subject to direct sunlight, excessive heat, or humidity.
- Keep paper in its original package after opening, and keep it in a flat place.
Preventing Paper Handling Precautions
To maintain long-lasting, high-quality print results, note the following points.

- Do not rub or scratch the printed surface. If they are rubbed or scratched, the ink may peel off.
- Do not touch the printed surface; otherwise, the ink may peel off.
- Make sure the printouts are completely dry before folding or stacking; otherwise, the color may change where they touch (leaves a mark). These marks will disappear if they are separated immediately and dried; however, they will remain if not separated.
- Do not use a dryer to dry the printouts.
- Avoid direct sunlight.
- Prevent color distortion while displaying or storing the printouts by following the instructions in the printer’s manual.

Loading Paper in the Paper Cassette
1. Open the front cover until it clicks.

Printer Settings

Select the menus on the control panel as described below.

Settings > General Settings > Printer Settings

Universal Print Settings:

These print settings are applied when you print by an external device without using the printer driver. The offset settings are applied when you print using the printer driver.

Top Offset:
Adjust the top margin of the paper.

Left Offset:
Adjust the left margin of the paper.

Check Paper Width:
Select On to check the paper width before printing. This prevents printing beyond the edges of the paper when the paper size setting is incorrect, but this may lower the print speed.

Skip Blank Page:
Skips blank pages in the print data automatically.

PC Connection via USB:
Select Enable to allow a computer to access the printer when connected by USB. When Disable is selected, printing that is not sent over a network connection is restricted.

Network Settings

Select the menus on the control panel as described below.

Settings > General Settings > Network Settings

Wi-Fi Setup:
Set up or change wireless network settings. Choose the connection method from the following and then follow the instructions on the LCD panel.

- Wi-Fi (Recommended)
- Wi-Fi Direct

Wired LAN Setup:
Set up or change a network connection that uses a LAN cable and router. When this is being used, Wi-Fi connections are disabled.
Network Status:
Displays or prints the current network settings.
- Wired LAN/Wi-Fi Status
- Wi-Fi Direct Status
- Print Status Sheet

Connection Check:
Checks the current network connection and prints a report. If there are any problems with the connection, see the report to solve the problem.

Advanced:
Make the following detailed settings.
- Device Name
- TCP/IP
- Proxy Server
- IPv6 Address
- Link Speed & Duplex

Printing from the Printer Driver on Windows

Accessing the Printer Driver

When accessing the printer driver from the computer's control panel, the settings are applied to all of the applications.

Accessing the printer driver from the control panel

  Click on the start button, and then select Windows System > Control Panel > View devices and printers in Hardware and Sound. Right-click on your printer, or press and hold it and then select Printing preferences.

  Select Desktop > Settings > Control Panel > View devices and printers in Hardware and Sound. Right-click on your printer, or press and hold it and then select Printing preferences.

- Windows 7/Windows Server 2008 R2
  Click the start button, and select Control Panel > View devices and printers in Hardware and Sound. Right-click on your printer and select Printing preferences.

- Windows Vista/Windows Server 2008
  Click the start button, and select Control Panel > Printers in Hardware and Sound. Right-click on your printer and select Printing preferences.

  Click the start button, and select Control Panel > Printers and Other Hardware > Printers and Faxes. Right-click on your printer and select Printing preferences.

Accessing the printer driver from the printer icon on the task bar

The printer icon on the desktop task bar is a shortcut icon allowing you to quickly access the printer driver.

If you click the printer icon and select Printer Settings, you can access the same printer settings window as the one displayed from the control panel. If you double-click this icon, you can check the status of the printer.

Note:
If the printer icon is not displayed on the task bar, access the printer driver window, click Monitoring Preferences on the Maintenance tab, and then select Register the shortcut icon to the taskbar.

Printing Basics

Note:
Operations may differ depending on the application. See the application's help for details.

1. Open the file you want to print.
   Load paper in the printer if it has not already been loaded.
2. Select Print or Page Setup from the File menu.

3. Select your printer.

4. Select Preferences or Properties to access the printer driver window.

5. Change the settings as necessary.
   
   See the menu options for the printer driver for details.
   
   Note:
   
   ❏ You can also see the online help for explanations of the setting items. Right-clicking an item displays Help.
   
   ❏ When you select Print Preview, you can see a preview of your document before printing.
   
   ❏ Even if nothing is set in the printer driver, the print data is reversed (mirrored) and printed. On the More Options tab, printing is not reversed if you clear Mirror Image.

6. Click OK to close the printer driver window.

7. Click Print.
   
   Note:
   
   When you select Print Preview, a preview window is displayed. To change the settings, click Cancel, and then repeat the procedure from step 2.

⚠️ **Important:**

Epson warranty does not cover damage caused by inks other than those specified, including any genuine Epson ink not designed for this printer or any third party ink.

Other products not manufactured by Epson may cause damage that is not covered by Epson's warranties, and under certain circumstances, may cause erratic printer behavior.
Ink Bottle Handling Precautions

Read the following instructions before refilling ink.

**Storing precautions for ink**

- Keep the ink bottles out of direct sunlight.
- Do not store the ink bottles in high or freezing temperatures.
- After bringing an ink bottle inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.
- Once you open an ink bottle, we recommend using it as soon as possible.
- To ensure printer quality, use all the ink in the ink tank before the earlier of the following dates:
  - Expiry date noted on the ink bottle
  - 25 days after the ink tank was refilled
- Do not open the ink bottle package until you are ready to fill the ink tank. The ink bottle is vacuum packed to maintain its reliability. If you leave an ink bottle unpacked for a long time before using it, normal printing may not be possible.
- When storing or transporting an ink bottle, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take precautions to prevent ink from leaking when transporting the bottle, for example, putting the bottle in a bag.

**Handling precautions for refilling ink**

- The ink for this printer must be handled carefully. Ink may splatter when the ink tanks are being filled or refilled with ink. If ink gets on your clothes or belongings, it may not come off.
- Use ink bottles with the correct part code for this printer.
- Do not shake too vigorously or squeeze the ink bottles.
- For optimum print results do not maintain low ink levels for extended periods of time.
- To obtain optimum printing results, refill the ink tanks to the upper line at least once every year.
- To ensure you receive premium print quality and to help protect your print head, a variable ink safety reserve remains in the ink tank when your printer indicates to refill ink.

**Ink consumption**

- To maintain optimum print head performance, some ink is consumed from all ink tanks during maintenance operations such as print head cleaning. Ink may also be consumed when you turn the printer on.
- When printing in monochrome or grayscale, color inks instead of black ink may be used depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.
The ink in the ink bottles supplied with your printer is partly used during initial setup. In order to produce high quality printouts, the print head in your printer will be fully charged with ink. This one-off process consumes a quantity of ink and therefore these bottles may print fewer pages compared to subsequent ink bottles.

### Refilling the Ink Tanks

Refill the ink when the ink level in the ink tank is less than half full.

1. Open the printer cover with both hands until it locks.

2. Open the ink tank cover.

Read all of the usage precautions for filling ink on the screen, and then proceed to the next screen.
3. Open the cap of the ink tank.

![Image of ink tank open](image)

**Important:**
Make sure that the color of the ink tank matches the ink color that you want to refill.

4. Make sure the ink bottle cap is closed securely.

5. Shake the ink bottle 15 times within five seconds.

![Image of shaking ink bottle](image)

**Important:**
- Epson recommends the use of genuine Epson ink bottles.
- Be careful not to spill any ink.

6. While holding the ink bottle upright, turn the cap slowly to remove it.

![Image of turning ink bottle cap](image)
7. Check the upper line (a) in the ink tank.

8. Align the top of the ink bottle with the filling port, and then insert it straight into the port to fill ink until it stops automatically at the upper line.

When you insert the ink bottle into the filling port for the correct color, ink starts pouring and the flow stops automatically when the ink reaches the upper line.

If the ink does not start flowing into the tank, remove the ink bottle and reinsert it. However, do not remove and reinsert the ink bottle when the ink has reached the upper line; otherwise ink may leak.
9. When you have finished filling the ink, remove the ink bottle.

**Important:**
Do not leave the ink bottle inserted; otherwise the bottle may be damaged or ink may leak.

**Note:**
If any ink remains in the ink bottle, tighten the cap and store the bottle upright for later use.

10. Close the ink tank cap securely.

11. Close the ink tank cover firmly.
12. Close the printer cover.

**Note:**
The printer cover is designed to close slowly and resist a little as a precaution against catching fingers. Continue to close even if you feel some resistance.

13. Follow the on-screen instructions to set the ink level of the color of the ink you refilled.

**Important:**
Even if you do not refill ink up to the upper line on the ink tank, you can continue using the printer. To keep your printer operating at its best, however, fill ink tank up to the upper line and reset the ink level immediately.

**Disposing of Used Consumables**

The following used ink materials are classified as industrial waste.

- Ink bottles
- Maintenance boxes
- Printed paper

Dispose of used consumables in accordance with laws and regulations, such as by contracting an industrial waste disposal company. When using an industrial waste disposal company, make sure you also give them the Product Safety Data Sheet.

You can download these from your local Epson Web site.
Maintenance Box Code

Epson recommends the use of a genuine Epson maintenance box.

Maintenance box code: C13S210125

**Important:**

> Once a maintenance box has been installed in a printer it cannot be used with other printers.

Maintenance Box Handling Precautions

Read the following instructions before replacing the maintenance box.

- Do not touch the green chip on the side of the maintenance box. Doing so may prevent normal operation and printing.
- Do not drop the maintenance box or subject it to strong shocks.
- Do not replace the maintenance box during printing; otherwise, ink may leak.
- Do not remove the maintenance box and its cover except when replacing the maintenance box; otherwise ink may leak.
- When the cover cannot be reattached, the maintenance box may not be installed correctly. Remove the maintenance box, and re-install it.
- Do not tilt the used maintenance box until after it is sealed in the plastic bag; otherwise ink may leak.
- Do not touch the openings in the maintenance box as you may get smeared with ink.
- Do not reuse a maintenance box which has been removed and left detached for a long period. Ink inside the box will have solidified and no more ink can be absorbed.
- Keep the maintenance box out of direct sunlight.
- Do not store the maintenance box in high or freezing temperatures.

Replacing a Maintenance Box

In some print cycles a very small amount of surplus ink may be collected in the maintenance box. To prevent ink leakage from the maintenance box, the printer is designed to stop printing when the absorbing capacity of the maintenance box has reached its limit. Whether and how often this is required will vary according to the number of pages you print, the type of material that you print and the number of cleaning cycles that the printer performs.

When a message is displayed prompting you to replace the maintenance box, refer to the animations displayed on the control panel. The need for replacement of the box does not mean that your printer has ceased to operate in
Refilling Ink and Replacing Maintenance Boxes

accordance with its specifications. The Epson warranty does not cover the cost of this replacement. It is a user-serviceable part.

Note:
- When it is full, you cannot print and clean the print head until the maintenance box is replaced to avoid ink leakage.

Maintaining the Printer

Checking and Cleaning the Print Head

If the nozzles are clogged, the printouts become faint, there is visible banding, or unexpected colors appear. When print quality has declined, use the nozzle check feature and check if the nozzles are clogged. If the nozzles are clogged, clean the print head.

**Important:**

- Do not open the printer cover or turn off the printer during head cleaning. If the head cleaning is incomplete, you may not be able to print.
- Because print head cleaning uses some ink, clean the print head only if quality declines.
- When ink is low, you may not be able to clean the print head.
- If print quality has not improved after repeating nozzle check and head cleaning three times, wait for at least 12 hours without printing, and then run the nozzle check again. We recommend to turn off the printer. If print quality has still not improved, run Power Cleaning. If it has still not improved, contact Epson support.
- To prevent the print head from drying out, do not unplug the printer while the power is on.

Checking and Cleaning the Print Head - Control Panel

1. Load A4- or Letter-size paper in the printer.

2. Select **Maintenance** on the home screen.
   
   To select an item, use the ▲▼◄► buttons, and then press the OK button.

3. Select **Print Head Nozzle Check**.

4. Follow the on-screen instructions to print the nozzle check pattern.

5. Check the printed pattern to see if the print head nozzles are clogged.

![A) OK][B) NG][C) NG]

- **A:**
  
  All lines are printed. Select ◐. No further steps are needed.
Maintaining the Printer

- B or close to B

Some nozzles are clogged. Select  
, and then follow the on-screen instructions to clean the print head.

- C or close to C

If most lines are missing or not printed, this indicates most nozzles are clogged. Select  
 to exit the nozzle check feature, and then run Power Cleaning. For details, see "Related information" below.

6. When cleaning is finished, print the nozzle check pattern again. Repeat cleaning and printing the pattern until all lines are printed completely.

Running Power Cleaning

The  
Power Cleaning utility allows you to replace all of the ink inside the ink tubes. In the following situations, you may need to use this feature to improve the print quality.
Maintaining the Printer

- You printed or performed head cleaning when the ink levels were too low to be seen in the ink tank windows.
- You performed the nozzle check and head cleaning several times and then waited for at least 12 hours without printing, but print quality still did not improve.

Before running this feature, read the following instructions.

**Important:**

Make sure that there is enough ink in the ink tanks.

Visually check that all of the ink tanks are at least half full. Low ink levels during Power Cleaning could damage the product.

**Important:**

An interval of 12 hours is required between each Power Cleaning.

Normally, a single Power Cleaning should resolve the print quality issue within 12 hours. Therefore, to avoid unnecessary ink usage, you must wait 12 hours before you try it again.

**Important:**

Maintenance box replacement may be required.

Ink will be deposited to the maintenance box. If it becomes full, you must prepare and install a replacement maintenance box to continue printing.

**Note:**

When the ink levels or the free space in the maintenance box are insufficient for Power Cleaning, you cannot run this feature. Even in this case, the levels and the free space for printing may remain.

**Running Power Cleaning - Control Panel**

Read the instructions for Power Cleaning before running this feature.

1. Press the \( \text{Power} \) button to turn off the printer.

2. While holding down the \( \text{Power} \) button, press the \( \text{Power} \) button to display the confirmation screen until the power light flashes.

3. Follow the on-screen instructions to run the Power Cleaning feature.
   
   **Note:**
   
   If you cannot run this feature, solve the problems that are displayed on the screen. Next, follow this procedure from step 1 to run this feature again.

4. After running this feature, run the nozzle check to make sure the nozzles are not clogged.

   For details on how to run the nozzle check, see the related information below.

Aligning the Print Head

If you notice a misalignment of vertical lines or blurred images, align the print head.

**Aligning the Print Head - Control Panel**

1. Load the actual A4- or Letter-size paper for which the adjustments will be made.
2. Select **Maintenance** on the home screen.
   
   To select an item, use the ▲▼buttons, and then press the OK button.
3. Select **Print Head Alignment**.
4. Select one of the alignment menus.
   - Vertical lines look misaligned or the printouts look blurry: Select **Vertical Alignment**.
   - Horizontal banding occurs at regular intervals: Select **Horizontal Alignment**.
5. Follow the on-screen instructions to print the alignment pattern.
Cleaning the Paper Path

When the printouts are smeared or paper does not feed correctly, clean the roller inside.

**Important:**
Do not use tissue paper to clean the inside of the printer. The print head nozzles may be clogged with lint.

Cleaning the Paper Path for Ink Smears

When the printouts are smeared or scuffed, clean the roller inside.

**Important:**
Do not use tissue paper to clean the inside of the printer. The print head nozzles may be clogged with lint.

1. Load A4- or Letter-size plain paper in the printer.
2. Select **Maintenance** on the home screen.
   - To select an item, use the ▲ ▼ ◄ ► buttons, and then press the OK button.
3. Select **Paper Guide Cleaning**.
4. Follow the on-screen instructions to clean the paper path.
   - **Note:**
     Repeat this procedure until the paper is not smeared with ink.

Cleaning the Paper Path for Paper Feeding Problems

When paper is not fed from paper cassette correctly, clean the roller inside.

1. Turn off the printer by pressing the ⚪ button.
2. Unplug the power cord, and then disconnect the power cord.
3. Make sure that the cap of the ink tank is securely closed.

![Image of ink tank cap]

**Important:**
*If the cap of the ink tank is not securely closed, ink may leak.*

4. Close the printer cover.

![Image of printer cover]

**Note:**
The printer cover is designed to close slowly and resist a little as a precaution against catching fingers. Continue to close even if you feel some resistance.

5. Slide out the paper cassette, and then remove the paper.
6. Stand the printer on its side with the printer’s ink tank at the bottom.

```
Caution:
Be careful not to trap your hand or fingers when standing the printer. Otherwise you may be injured.
```

```
Important:
Do not leave the printer standing for a long time.
```

7. Dampen a soft cloth with water, wring it out thoroughly, and then wipe the roller while rotating it with the cloth.

8. Return the printer to its normal position, and then insert the paper cassette.

9. Connect the power cord.

### Cleaning the Translucent Film

When the printout is not improved after aligning the print head or cleaning the paper path, the translucent film inside the printer may be smeared.

**Items required:**

- Cotton swabs (several)
Water with a few drops of detergent (2 to 3 drops of detergent in 1/4 cup of tap water)
Light for checking smears

**Important:**

*Do not use cleaning liquid other than water with a few drops of detergent.*

1. Turn off the printer by pressing the button.
2. Close the document cover if it is open.
3. Open the printer cover.
4. Check if the translucent film is smeared. Smears are easier to see if you use a light.

If there are smears (such as finger marks or grease) on the translucent film (A), go to the next step.

A: Translucent film
B: Rail

⚠️ Important:

Be careful not to touch the rail (B). Otherwise, you may not be able to print. Do not wipe off the grease on the rail, because this is necessary for operations.

5. Moisten a cotton swab with the water with a few drops of detergent so that it is not dripping water, and then wipe the smeared part.
Maintaining the Printer

6. Use a new dry cotton swab to wipe the film.

**Important:**
Wipe off the smear gently. If you press the cotton swab too hard to the film, the springs of the film may be dislocated and the printer may be damaged.

**Important:**
Do not leave any fibers on the film.

**Note:**
To prevent the smear from spreading, frequently replace the cotton swab with a new one.

7. Repeat steps 5 and 6 until the film is not smeared.

8. Visually check that the film is not smeared.

9. Close the printer cover.

**Note:**
The printer cover is designed to close slowly and resist a little as a precaution against catching fingers. Continue to close even if you feel some resistance.
Cleaning the Printer

If the components and the case are dirty or dusty, turn off the printer and clean them using a soft, clean cloth that has been dampened with water. If you cannot remove the dirt, try adding a small amount of mild detergent to the damp cloth.

**Important:**
- Be careful not to get water onto the printer mechanism or any electrical components. Otherwise, the printer could be damaged.
- Never use alcohol or paint thinner to clean the components and the case. These chemicals can damage them.
- Do not touch the parts shown in the following illustration. Doing so may cause a malfunction.

Checking the Total Number of Pages Fed Through the Printer

You can check the total number of pages fed through the printer.

Checking the Total Number of Pages Fed Through the Printer - Control Panel

The information is printed together with the nozzle check pattern.

1. Load A4- or Letter-size plain paper in the printer.
2. Select **Maintenance** on the home screen.

Software Information

This section introduces the software products available for your printer from the Epson website.

Application for Configuring Printer Operations (Web Config)

Web Config is an application that runs in a web browser, such as Internet Explorer and Safari, on a computer or smart device. You can confirm the printer status or change the network service and printer settings. To use the Web Config, connect the printer and the computer or device to the same network.

The following browsers are supported.

Microsoft Edge, Internet Explorer 8 or later, Firefox*, Chrome*, Safari*

* Use the latest version.

Note:
If the administrator password has not been set when accessing Web Config, the password must be set on the administrator password setting page.

Do not forget the user name and the password. If you forget them, you will need to contact Epson service support.

Running Web Config on a Web Browser

1. Check the printer’s IP address.
   Select the network icon on the printer’s home screen, and then select the active connection method to confirm the printer’s IP address.
   
   To select an item, use the ▲▼◄► buttons, and then press the OK button.

   Note:
   You can also check the IP address by printing the network connection report.

2. Launch a Web browser from a computer or smart device, and then enter the printer’s IP address.
   Format:
   IPv4: http://the printer’s IP address/
   IPv6: http://[the printer’s IP address]/
   Examples:
   IPv4: http://192.168.100.201/
   IPv6: http://[2001:db8::1000:1]/

   Since the printer uses a self-signed certificate when accessing HTTPS, a warning is displayed on the browser when you start Web Config; this does not indicate a problem and can be safely ignored.

Related Information

⇒ “Printing a Network Connection Report” on page 28
Running Web Config on Windows

When connecting a computer to the printer using WSD, follow the steps below to run Web Config.

1. Open the printer list on the computer.
   - Windows 10
     Click on the start button, and then select Windows System > Control Panel > View devices and printers in Hardware and Sound.
   - Windows 8.1/Windows 8
     Select Desktop > Settings > Control Panel > View devices and printers in Hardware and Sound (or Hardware).
   - Windows 7
     Click the start button, and select Control Panel > View devices and printers in Hardware and Sound.
   - Windows Vista
     Click the start button, and select Control Panel > Printers in Hardware and Sound.

2. Right-click on your printer and select Properties.

3. Select the Web Service tab and click the URL.

Since the printer uses a self-signed certificate when accessing HTTPS, a warning is displayed on the browser when you start Web Config; this does not indicate a problem and can be safely ignored.

Running Web Config on Mac OS

1. Select System Preferences from the Apple menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer.

2. Click Options & Supplies > Show Printer Webpage.

Since the printer uses a self-signed certificate when accessing HTTPS, a warning is displayed on the browser when you start Web Config; this does not indicate a problem and can be safely ignored.

Application for Updating Software and Firmware (Epson Software Updater)

Epson Software Updater is an application that installs new software, and updates firmware over the Internet. If you want to check for update information regularly, you can set the interval for checking for updates in Epson Software Updater’s Auto Update Settings.

Note:
*Windows Server operating systems are not supported.*

Starting on Windows

- Windows 10
  Click the start button, and then select EPSON Software > Epson Software Updater.
Windows 8.1/Windows 8
Enter the application name in the search charm, and then select the displayed icon.

Windows 7/Windows Vista/Windows XP
Click the start button, and then select All Programs (or Programs) > EPSON Software > Epson Software Updater.

Note:
You can also start Epson Software Updater by clicking the printer icon on the task bar on the desktop, and then selecting Software Update.

Starting on Mac OS
Select Go > Applications > Epson Software > Epson Software Updater.

Installing the Latest Applications

Note:
When reinstalling an application, you need to uninstall it first.

1. Make sure the printer and the computer are available for communication, and the printer is connected to the Internet.

2. Start EPSON Software Updater.
The screenshot is an example on Windows.

3. For Windows, select your printer, and then click to check for the latest available applications.
4. Select the items you want to install or update, and then click the install button.

**Important:**

Do not turn off or unplug the printer until the update is complete; otherwise, the printer may malfunction.

**Note:**

- You can download the latest applications from the Epson website.
  
  http://www.epson.com

  **North America and Latin America**
  
  To view and download software options, visit:
  
  www.epson.com/support/scf170 (U.S.)
  
  www.epson.ca/support/scf170 (Canada)

### Updating the Printer's Firmware using the Control Panel

If the printer is connected to the Internet, you can update the printer's firmware using the control panel. You can also set the printer to regularly check for firmware updates and notify you if any are available.

1. Select **Settings** on the home screen.
   
   To select an item, use the ▲▼◄► buttons, and then press the OK button.

2. Select **Firmware Update > Update**.
   
   **Note:**
   
   Enable **Notification** to set the printer to regularly check for available firmware updates.

3. Check the message displayed on the screen and press **Start Checking** to start searching for available updates.
4. If a message is displayed on the LCD screen informing you that a firmware update is available, follow the on-screen instructions to start the update.

**Important:**

- Do not turn off or unplug the printer until the update is complete; otherwise, the printer may malfunction.
- If the firmware update is not completed or is unsuccessful, the printer does not start up normally and "Recovery Mode" is displayed on the LCD screen the next time the printer is turned on. In this situation, you need to update the firmware again using a computer. Connect the printer to the computer with a USB cable. While "Recovery Mode" is displayed on the printer, you cannot update the firmware over a network connection. On the computer, access your local Epson website, and then download the latest printer firmware. See the instructions on the website for the next steps.

---

**Uninstalling Applications**

Log in to your computer as an administrator. Enter the administrator password if the computer prompts you.

**Uninstalling Applications - Windows**

1. Press the \( \bigcirc \) button to turn off the printer.

2. Quit all running applications.

3. Open Control Panel:
     Click on the start button, and then select **Windows System > Control Panel**.
     Select **Desktop > Settings > Control Panel**.
     Click the start button and select **Control Panel**.

4. Open **Uninstall a program** (or **Add or Remove Programs**):
     Select **Uninstall a program** in **Programs**.
     Click **Add or Remove Programs**.

5. Select the application you want to uninstall.

   You cannot uninstall the printer driver if there is any print jobs. Delete or wait to be printed the jobs before uninstalling.
6. Uninstall the applications:

  
  Click Uninstall/Change or Uninstall.

  
  Click Change/Remove or Remove.

Note:
If the User Account Control window is displayed, click Continue.

7. Follow the on-screen instructions.

Uninstalling Applications - Mac OS

1. Download the Uninstaller using EPSON Software Updater.

   Once you have downloaded the Uninstaller, you do not need to download it again each time you uninstall the application.

2. Press the button to turn off the printer.

3. To uninstall the printer driver, select System Preferences from the Apple menu > Printers & Scanners (or Print & Scan, Print & Fax), and then remove the printer from the enabled printers list.

4. Quit all running applications.

5. Select Go > Applications > Epson Software > Uninstaller.

6. Select the application you want to uninstall, and then click Uninstall.

Important:
The Uninstaller removes all drivers for Epson inkjet printers on the computer. If you use multiple Epson inkjet printers and you only want to delete some drivers, delete all of them first, and then install the necessary printer driver again.

Note:
If you cannot find the application you want to uninstall in the application list, you cannot uninstall using the Uninstaller. In this situation, select Go > Applications > Epson Software, select the application you want to uninstall, and then drag it to the trash icon.

Checking the Printer Status - Windows

1. Access the printer driver window.
2. Click EPSON Status Monitor 3 on the Maintenance tab.

   **Note:**
   - You can also check the printer status by double-clicking the printer icon on the taskbar. If the printer icon is not added to the taskbar, click **Monitoring Preferences** on the Maintenance tab, and then select **Register the shortcut icon to the taskbar**.
   - If **EPSON Status Monitor 3** is disabled, click **Extended Settings** on the Maintenance tab, and then select **Enable EPSON Status Monitor 3**.

### Checking the Printer Status - Mac OS

1. Select **System Preferences** from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer.

2. Click **Options & Supplies** > **Utility** > **Open Printer Utility**.

3. Click **EPSON Status Monitor**.
   - You can check the printer status, ink levels, and error status.

### Checking the Software Status

You may be able to clear the problem by updating the software to the latest version. To check the software status, use the software update tool.

### Removing Jammed Paper

Follow the on-screen instructions on the printer’s control panel to locate and remove the jammed paper including any torn pieces. The LCD screen displays an animation that shows you how to remove jammed paper.

> **Caution:**

Never touch the buttons on the control panel while your hand is inside the printer. If the printer starts operating, it could cause an injury. Be careful not to touch the protruding parts to avoid injury.
Important:

- Remove the jammed paper carefully. Removing the paper vigorously may cause damage to the printer.
- When removing jammed paper, avoid tilting the printer, placing it vertically, or turning it upside down; otherwise ink may leak.

Removing Jammed Paper

Caution:

- Be careful not to trap your hand or fingers when opening or closing the printer cover. Otherwise you may be injured.
- Never touch the buttons on the control panel while your hand is inside the printer. If the printer starts operating, it could cause an injury. Be careful not to touch the protruding parts to avoid injury.

1. Remove the rear cover.

2. Remove the jammed paper.
3. Remove jammed paper from the rear cover.

4. Insert the rear cover in the printer.

5. Close the document cover if it is open.

6. Open the printer cover with both hand until it locks.

7. Remove the jammed paper.
Important:
Do not touch the white flat cable, translucent film, and ink tubes inside the printer. Doing so may cause a malfunction.

8. Close the printer cover.

Note:
The printer cover is designed to close slowly and resist a little as a precaution against catching fingers. Continue to close even if you feel some resistance.

Paper Does Not Feed Correctly

Check the following points, and then take the appropriate actions to solve the problem.

- Place the printer on a flat surface and operate in the recommended environmental conditions.
- Use paper supported by this printer.
- Follow the paper handling precautions.
- Do not load more than the maximum number of sheets specified for the paper.
- Make sure the paper size and paper type settings match the actual paper size and paper type loaded in the printer.
Clean the roller inside the printer.

### Power and Control Panel Problems

#### Power Does Not Turn On
- Make sure the power cord is securely plugged in.
- Hold down the button for a little longer.

#### Power Does Not Turn Off
Hold down the button for a little longer. If you still cannot turn off the printer, unplug the power cord. To prevent the print head from drying out, turn the printer back on and turn it off by pressing the button.

#### Power Turns Off Automatically
- Select Settings > General Settings > Basic Settings > Power Off Settings, and then disable the Power Off If Inactive and Power Off If Disconnected settings.
- Select Settings > General Settings > Basic Settings, and then disable the Power Off Timer Setting.
Note:
Your product may have the Power Off Settings or Power Off Timer feature depending on the location of purchase.

LCD Screen Gets Dark

The printer is in sleep mode. Press any button on the control panel to return the LCD screen to its former state.

Cannot Print from a Computer

Checking the Connection (USB)

- Connect the USB cable securely to the printer and the computer.
- If you are using a USB hub, try to connect the printer directly to the computer.
- If the USB cable cannot be recognized, change the port, or change the USB cable.
- If the printer cannot print using a USB connection, try the following.
  Disconnect the USB cable from the computer. Right-click on the printer icon displayed on the computer, and then select Remove Device. Next, connect the USB cable to the computer and try a test print.
  Re-set the USB connection by following the steps in this manual for changing the connection method to a computer. See the related information link below for details.

Checking the Connection (Network)

- When you have changed your access point or provider, try making network settings for the printer again.
  Connect the computer or smart device to the same SSID as the printer.
- Turn off the devices you want to connect to the network. Wait for about 10 seconds, and then turn on the devices in the following order; access point, computer or smart device, and then printer. Move the printer and computer or smart device closer to the access point to help with radio wave communication, and then try to make network settings again.
- Print the network connection report. See the related information link below for details. If the report shows that the network connection failed, check the network connection report and then follow the printed solutions.
If the IP address assigned to the printer is 169.254.XXX.XXX, and the subnet mask is 255.255.0.0, the IP address may not be assigned correctly. Restart the access point or reset the network settings for the printer. If this does not solve the problem, see the documentation for the access point.

Try accessing any website from your computer to make sure that your computer's network settings are correct. If you cannot access any website, there is a problem on the computer. Check the network connection of the computer.

Checking the Software and Data

Make sure that a genuine Epson printer driver is installed. If a genuine Epson printer driver is not installed, the available functions are limited. We recommend using a genuine Epson printer driver. See the related information link below for details.

If you are printing a large data size image, the computer may run out of memory. Print the image at a lower resolution or a smaller size.

Checking for Genuine Epson Printer Drivers

You can check if a genuine Epson printer driver is installed on your computer by using one of the following methods.

Windows
Select Control Panel > View devices and printers (Printers, Printers and Faxes), and then do the following to open the print server properties window.

  - Click the printer icon, and then click Print server properties at the top of the window.
- Windows Vista/Windows Server 2008
  - Right-click on the Printers folder, and then click Run as administrator > Server Properties.
  - From the File menu, select Server Properties.
Click the **Driver** tab. If your printer name is displayed in the list, a genuine Epson printer driver is installed on your computer.

**Mac OS**

Select **System Preferences** from the Apple menu > **Printers & Scanners** (or **Print & Scan, Print & Fax**), and then select the printer. Click **Options & Supplies**, and if the **Options** tab and **Utility** tab are displayed on the window, a genuine Epson printer driver is installed on your computer.

**Related Information**

➤ “Installing the Latest Applications” on page 92
Checking the Printer Status from the Computer (Windows)

Click Print Queue on the printer driver’s Maintenance tab, and then check the following.

- Check if there are any paused print jobs.
  If unnecessary data remains, select Cancel all documents from the Printer menu.
- Make sure the printer is not offline or pending.
  If the printer is offline or pending, clear the offline or pending setting from the Printer menu.

- Make sure the printer is selected as the default printer from the Printer menu (there should be a check mark on the menu item).
  If the printer is not selected as the default printer, set it as the default printer. If there are multiple icons in Control Panel > View devices and printers (Printers, Printers and Faxes), see the following to select the icon.
  Example)
  USB connection: EPSON XXXX Series
  Network connection: EPSON XXXX Series (network)
  If you install the printer driver multiple times, copies of printer driver may be created. If copies such as "EPSON XXXX Series (copy 1)" are created, right-click the copied driver icon, and then click Remove Device.
- Make sure the printer port is selected correctly in Property > Port from the Printer menu as follows.
  Select "USBXXX" for a USB connection, or "EpsonNet Print Port" for a network connection.

Checking the Printer Status from the Computer (Mac OS)

Make sure the printer status is not Pause.

Select System Preferences from the Apple menu > Printers & Scanners (or Print & Scan, Print & Fax), and then double-click the printer. If the printer is paused, click Resume (or Resume Printer).
When You Cannot Make Network Settings

- Turn off the devices you want to connect to the network. Wait for about 10 seconds, and then turn on the devices in the following order; access point, computer or smart device, and then printer. Move the printer and computer or smart device closer to the access point to help with radio wave communication, and then try to make network settings again.

- Select Settings > General Settings > Network Settings > Connection Check, and then print the network connection report. If an error has occurred, check the network connection report and then follow the printed solutions.

Cannot Connect from Devices Even Though Network Settings are No Problems

If you cannot connect from the computer or smart device to the printer even though the network connection report does not show any problems, see the following.

- When you are using multiple wireless routers at the same time, you may not be able to use the printer from the computer or smart device depending on the settings of the wireless routers. Connect the computer or smart device to the same wireless router as the printer.
  - Disable the tethering function on the smart device if it is enabled.
You may not be able to connect to the wireless router when the wireless router has multiple SSIDs and devices are connected to different SSIDs on the same wireless router. Connect the computer or smart device to the same SSID as the printer.

A wireless router that is compliant with both IEEE802.11a and IEEE802.11g has SSIDs of 2.4 GHz and 5 GHz. If you connect the computer or smart device to a 5 GHz SSID, you cannot connect to the printer because the printer only supports communication over 2.4 GHz. Connect the computer or smart device to the same SSID as the printer.

Most wireless routers have a privacy separator feature that blocks communication between connected devices. If you cannot communicate between the printer and the computer or smart device even if they are connected to the same network, disable the privacy separator on the wireless router. See the manual provided with the wireless router for details.

Mac OS

Click the Wi-Fi icon at the top of the computer screen. A list of SSIDs is displayed and the connected SSID is indicated with a check mark.

Printout Problems

Printout is Scuffed or Color is Missing

- If you have not used the printer for a long time, the print head nozzles may be clogged and ink drops may not be discharged. Perform a nozzle check, and then clean the print head if any of the print head nozzles are clogged.

- If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and then use the Power Cleaning utility to replace the ink inside the ink tubes. After you use the utility, perform a nozzle check to see if print quality has improved.

Light Banding Appears in Darker Painted Areas Even After Cleaning the Print Head
If you print using the standard quality setting, light banding may appear in the printout. When you transfer this to cloth, the banding may not be visible. Check the image after transfer. If banding appears even after transferring, print using a higher quality setting.

**Banding or Unexpected Colors Appear**

The print head nozzles may be clogged. Perform a nozzle check to check if the print head nozzles are clogged. Clean the print head if any of the print head nozzles are clogged.

Print Quality Does Not Improve Even After Aligning the Print Head

During bidirectional (or high speed) printing, the print head prints while moving in both directions, and vertical lines may be misaligned. If print quality does not improve, disable the bidirectional (or high speed) setting. Disabling this setting may slow down printing speed.

- **Windows**
  Clear Bidirectional Printing on the printer driver’s More Options tab.

- **Mac OS**
  Select System Preferences from the Apple menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer. Click Options & Supplies > Options (or Driver). Select Off as the Bidirectional Printing setting.

Printout Comes Out as a Blank Sheet

- The print head nozzles may be clogged. Perform the nozzle check, and then try Power Cleaning if the print head nozzles are clogged.

- The print settings and the paper size loaded in the printer are different. Change the print settings according to the paper size loaded in the printer. Load paper in the printer that matches the print settings.

- Multiple sheets of paper are fed into the printer at the same time. See the following to prevent multiple sheets of paper being fed into the printer at the same time.
Print Quality is Poor

Check the following if the print quality is poor due to blurry prints, banding, missing colors, faded colors, and misalignment in the prints.

Checking the printer
- Make sure the initial ink charging is complete.
- Refill the ink tank if the ink level is below the lower line.
- Perform a nozzle check, and then clean the print head if any of the print head nozzles are clogged.
- Align the print head.

Checking the paper
- Use paper supported by this printer.
- Do not print on paper that is damp, damaged, or too old.
- If the paper is curled or the envelope is puffed up, flatten it.
- Do not stack the paper immediately after printing.
- Dry the printouts completely before filing or displaying them. When drying the printouts, avoid direct sun light, do not use a dryer, and do not touch the printed side of paper.

Checking the print settings
- Select the appropriate paper type setting for the type of paper loaded in the printer.
- Print using a higher quality setting.

Checking the ink bottle
- Use ink bottles with the correct part code for this printer.
- To ensure printer quality, use all the ink in the ink tank before the earlier of the following dates.
  - Expiry date noted on the ink bottle
  - 25 days after the ink tank was refilled
- Try to use genuine Epson ink bottles. This product is designed to adjust colors based on the use of genuine Epson ink bottles. The use of non-genuine ink bottles may cause print quality to decline.

Paper Is Smeared or Scuffed

- When horizontal banding appears or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.

- When vertical banding appears or the paper is smeared, clean the paper path.
When the problem cannot be cleared after cleaning the paper path, the part inside the printer that is shown in the illustration is smeared. Turn off the printer, and then wipe off the ink using a cotton swab.

Do not touch the white flat cable, translucent film, and ink tubes inside the printer. Doing so may cause a malfunction.

Place the paper on a flat surface to check if it is curled. If it is, flatten it.

The Position, Size, or Margins of the Printout Are Incorrect

- Load paper in the correct direction, and slide the edge guides against the edges of the paper.
- Select the appropriate paper size setting.
- Adjust the margin setting in the application so that it falls within the printable area.
Solving Problems

Printed Characters Are Incorrect or Garbled

- Connect the USB cable securely to the printer and the computer.
- Cancel any paused print jobs.
- Do not put the computer manually into the Hibernate mode or the Sleep mode while printing. Pages of garbled text may be printed next time you start the computer.
- If you use the printer driver you had previously used, printed characters may be garbled. Make sure that the printer driver you are using is for this printer. Check the printer name on the top of the printer driver window.

The Printed Image is Not Inverted

Select any mirror image settings in the printer driver or the application.

- Windows
  Select Mirror Image on the printer driver’s More Options tab.
- Mac OS
  Select Mirror Image from the print dialog’s Print Settings menu.

Mosaic-Like Patterns in the Prints

When printing images or photos, print using high-resolution data. Images on websites are often low resolution although they look good enough on the display, and so print quality may decline.

The Printout Problem Could Not be Cleared

If you have tried all of the solutions and have not solved the problem, try uninstalling and then reinstalling the printer driver.

Other Printing Problems

Printing Is Too Slow

- Close any unnecessary applications.
- Lower the quality setting. High quality printing slows down the printing speed.
- Enable the bidirectional (or high speed) setting. When this setting is enabled, the print head prints while moving in both directions, and the printing speed increases.

- Windows
  Select Bidirectional Printing on the printer driver’s More Options tab.
- Mac OS
  Select System Preferences from the Apple menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer. Click Options & Supplies > Options (or Driver). Select On as the Bidirectional Printing setting.
Printing Slows Down Dramatically During Continuous Printing

Printing slows down to prevent the printer mechanism from overheating and being damaged. However, you can continue printing. To return to normal printing speed, leave the printer idle for at least 30 minutes. Printing speed does not return to normal if the power is off.

Other Problems

Slight Electric Shock when Touching the Printer

If many peripherals are connected to the computer, you may feel a slight electric shock when touching the printer. Install a ground wire to the computer that is connected to the printer.

A Message Prompting You to Reset the Ink Levels is Displayed

Refill all or the specified ink tanks, select the color that you refilled on the LCD screen, and then reset the ink levels.

Depending on the usage conditions, the message may be displayed when there is still ink in the tank.

Ink Spilled

- If ink adheres to the area around the tank, wipe it off using a napless, clean cloth or cotton swab.
- If ink spills on the desk or floor, wipe it off immediately. When ink is dried, it will be difficult to remove the smear. To prevent the smear from spreading, blot the ink with a dry cloth, and then wipe it with a moist cloth.
- If ink gets on your hands, wash them with water and soap.

Print Head is Automatically Cleaned

To ensure print quality, the printer may automatically perform head cleaning when the printer is turned on, or before starting printing.

Restrictions on Copying

Observe the following restrictions to ensure the responsible and legal use of the printer.

Copying of the following items is prohibited by law:

- Bank bills, coins, government-issued marketable securities, government bond securities, and municipal securities
- Unused postage stamps, pre-stamped postcards, and other official postal items bearing valid postage
- Government-issued revenue stamps, and securities issued according to legal procedure

Exercise caution when copying the following items:

- Private marketable securities (stock certificates, negotiable notes, checks, etc.), monthly passes, concession tickets, etc.
- Passports, driver's licenses, warrants of fitness, road passes, food stamps, tickets, etc.
Transporting and Storing the Printer

When you need to store the printer or transport it when moving or for repairs, follow the steps below to pack the printer.

1. Turn off the printer by pressing the button.

2. Make sure the power light turns off, and then unplug the power cord.

   **Important:**
   
   Unplug the power cord when the power light is off. Otherwise, the print head does not return to the home position causing the ink to dry, and printing may become impossible.

3. Disconnect all cables such as the power cord and USB cable.

4. Remove all of the paper from the printer.

5. Open the printer cover with both hand until it locks.
6. Secure the print head to the case with tape.

7. Make sure to install the cap onto the ink tank securely.

8. Close the ink tank cover securely.
9. Close the printer cover.

Note: The printer cover is designed to close slowly and resist a little as a precaution against catching fingers. Continue to close even if you feel some resistance.

10. Prepare to pack the printer as shown below.

11. Place the printer in the plastic bag provided for transporting and close the bag.

12. Pack the printer in its box using the protective materials.
**Important:**

- When storing or transporting the printer, place the printer in the plastic bag and fold it closed. Avoid tilting the printer, placing it vertically, or turning it upside down; otherwise ink may leak.

- When storing or transporting an ink bottle, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take precautions to prevent ink from leaking when transporting the bottle, for example, putting the bottle in a bag.

- Do not put opened ink bottles in the box with printer.

When you use the printer again, make sure you remove the tape securing the print head. If print quality has declined the next time you print, clean and align the print head.

Contacting Epson Support

Before Contacting Epson

If your Epson product is not operating properly and you cannot solve the problem using the troubleshooting information in your product manuals, contact Epson support services for assistance. If Epson support for your area is not listed below, contact the dealer where you purchased your product.

Epson support will be able to help you much more quickly if you give them the following information:

- Product serial number
  (The serial number label is usually on the back of the product.)
- Product model
- Product software version
  (Click About, Version Info, or a similar button in the product software.)
- Brand and model of your computer
- Your computer operating system name and version
- Names and versions of the software applications you normally use with your product

Note:
Depending on the product, network settings may be stored in the product's memory. Due to breakdown or repair of a product, settings may be lost. Epson shall not be responsible for the loss of any data, for backing up or recovering settings even during a warranty period. We recommend that you make your own backup data or take notes.
